

Martisan-Kolinsky brushes are manufactured with a newly developed mixture of synthetic hair.

Different diameters and lengths of hair guarantee high elasticity

The unique surface of the hair shaft in conjunction with the brush body assures high color capacity and allows specific color output

The life of these brushes surpass that of natural hair brushes, especially when working on rough surfaces.

Martisan-Kolinsky is available: **Rounds** for detail and precision working, **Brights** for large area work

Filberts that combine the advantages of flat and round brushes, **Fan Blenders** for creating special effects

only by  **kolibri**[®]
